

Product Information

Window Vinyl Graphics

Surface Preparation

Window vinyl graphics must be applied to a clean dust free surface. Be sure your windows are free of debris such as paint or built up residue. Use a glass cleaner to remove any unwanted impurities or streaks. Let dry prior to applying.

Bonding Period

The pressure sensitive adhesive bonds to the glass very well when first applied but sets more firmly after a 24 hour period. Avoid cleaning your window and graphic for 24 hours.

- Avoid cleaning for 24 hours
- Avoid squeegeeing for 72 hours.
- If small bubbles arise in your graphic during the first 72 hours do not be alarmed. This can occur as the moisture behind the application dissipates. If the bubbles are still present after one week contact us.

Care & Maintenance

In order to maintain your window graphic's original appearance it is important to adhere to the following guidelines.

- When cleaning, window cleaner or a soap and water solution is best.
- Your graphics should be hand-cleaned only. Use soft cloth, rags and sponges for cleaning. Do not use scrubbing pads or scouring sponges.
- Use caution when squeegeeing. Do not scrape along your graphics edges or seams.

Removing difficult pollutants or debris from applied window graphics.

When normal cleaning procedures don't work to remove difficult debris from your applied vehicle graphics, try the following.

- Spot clean the area with Isopropyl Alcohol and a micro fiber rag.
- Moisten a rag with a citrus based cleaner and naphtha and wipe down the problem areas. Immediately after using the citrus cleaner and naphtha rinse the area with water and soap.

The window vinyl can be removed by using a thin scraper device. It is best to start in one corner and lift up a small section. After this is done, you can manually pull the image from the glass. As with any decal or sticker, the warmer the outside temperature the easier the removal will be. If any adhesive residue remains on the glass surface it can be cleaned with any quality commercial glass cleaning liquid or citrus-based adhesive remover / cleaner.
